El proceso de selección se prevé cerrarlo en un muy breve plazo de tiempo.

Requisition #: 2037944

Job Title: Field Service Engineer (Madrid or Barcelona)

Job Level: Advanced

Description: Agilent's Life Science/ Chemical Analysis Group (LSCA) is a leading provider of analytical instrument systems that enable customers to identify, quantify, analyze and test the molecular, physical and biological properties of thousands of substances and products. LSCA has five sites worldwide: Waldbronn in Germany, Little Falls and Palo Alto in the USA, Tokyo in Japan, and Shanghai in China.

As part of a highly qualified team of hard working and fun loving engineers you are the backbone of our great company by making sure that we stay ahead of the competition and keep on reaffirming our name as a global leader in test & measurement equipment. Part of that position we thank to our ability to provide customers with a superb support team that quickly responds to any issues they may have. Our customer satisfaction rates set us apart from the competition.

You have the responsibility of supporting our clients for on-site installation,application setup, maintenance and repair of many of the quality products that we manufacture and sell. This can be very complex multimillion dollar projects around LC, LC/MS, GC, GC/MS instruments etc. complete with the appropriate software solutions. Additionally you can tweak your consulting skills and improve customer satisfaction by proactively advising customers on preventive maintenance and configurations, which may impact product performance. We will make sure you get all the training and development opportunities you need to become

Agilent Technologies

the best in your field.

Qualifications:

To be really successful in the job you should have a relevant Master Degree or University Degree in Chemistry, Biochemistry or Biology and approximately 5 years of relevant experience in Mass Spectrometry applications/instrument support. You enjoy being in front of customers and supporting them while demonstrating your technical expertise.

Interested in joining the world's leading test & measurement company and you have what it takes for such an exciting position, then don't hesitate to apply!
