

VHIO / IR-HUVH Proteomics Technician Position

A position is open for a research technician in the Proteomics Laboratory and Core facility at the Vall d'Hebron Institute of Oncology (VHIO) – Vall d'Hebron University Hospital Research Institute.

Candidate Requirements:

- Suitable academic degree (or PhD): Chemistry, Biochemistry, Biotechnology, Biology,...
- Experience in proteomic techniques: 2D-electrophoresis, chromatography, mass spectrometry, bioinformatic tools.
- Willing to learn and apply new techniques and methods.

The successful applicant will join an active Proteomics Core Facility working on a Cancer Research Institute environment, markedly oriented to translational research. The applicant will collaborate in both service work and ongoing research projects in the lab.
