

Senior Scientist / Proteomics Specialist:

Company:

IGEN BIOTECH GROUP is working in new approaches to Medicine, discovering a variety of biological activities from vegetal and animal sources, which entail a major potential in terms of therapy and preventive diagnosis.

IGEN BIOLAB, as part of Igen Biotech Group works on the specific development of a functional protein profile for oncological and degenerative diseases.

IGEN BIOLAB specializes in protein production, bacterial characterization and development of manufacturing processes that are optimized for robust high scale up production.

Our R&D facilities include technical areas of In vitro cultivation and testing of microorganisms, mass spectrometry-based proteomics technologies to identify, characterize and quantify target proteins in various biological and biomedical samples, metabolomics for detection and quantification of small molecules (metabolites) in biological materials, microbiomics focusing on using molecular DNA microarray technology to address the complexities of human infections and environmental microbiome ecology.

Our commitment is to develop functional protein immunotherapies that help physicians and other healthcare professionals to provide high quality medical nutrition care and to improve patients' quality of life.

Job description:

The position offers the opportunity to:

- Join an enthusiastic, highly motivated team within an important R&D project.
- Develop and support proteomics projects by using the most innovating technologies.
- Use of own research facilities
- Play an important role implementing new concepts in immunotherapy.
- Work in a nice working atmosphere.

Job Requirements:

We are looking for:

- Doctoral degree or equivalent in, Biology, Biochemistry, Chemistry or related field with a primary focus in proteomics.
- Broad knowledge of biology and molecular techniques in protein science and chemistry.
- Proven experience with MALDI-TOF, Mass Spectrometry, Electrophoresis, HPLC, identification and proteins' analysis
- A team player with strong organizational skills.
- Analytic and result oriented with effective interpersonal and communications skills.
- Fluent in English
