

The International Association for Protein Structure Analysis and Proteomics invites you to:

The Satellite Meeting on Methods in Protein Structural Analysis (MPSA)

"Proteomics in Cancer and Infectious Diseases"

Varadero, Cuba November 10th to 13th, 2007

This special meeting will take place in the hotel "Club Amigo Varadero" located in the best virgin area of Varadero beach. This is the first time that the conference will be held in a Latin-American country.

The main topics of the conference are:

- Proteomics and the study of infectious mechanisms in humans, animals and plants
- Proteomics and cancer
- Proteomics and vaccine and drug development
- Method development (2D gel electrophoresis, mass spectrometry, LC-MS-MS, etc.)
- Proteomics and natural products
- Structural Proteomics
- Glycomics
